Run Results

- Run #15 (bc295ac): 1967 txns, 31 OB adj, TB=825,607.88 (target=843,234.84)
- Run #14e (d8b7650): 1967 txns, 69 OB adj, TB=1,636,733.24 (double-counted)

Important Notes

- Always commit changes with clear “Fix:” messages explaining WHY
- Always add inline comments in code explaining bug fixes
- Git workflow is FAST and RELIABLE — use it over file transfers
- Watchdog MUST be PAUSED during post-import _close_qb (resume re-hides window → data loss)
- Notepad = Joseph’s intercom — STOP and READ when it appears
- Company name update is MANUAL — Joseph does it himself
